

Motivations

This page documents motivations behind conventions and decisions in the framework.

File structure

Different entry points for areas

```
admin
  index.php
  index.local.php
  .htaccess
index.php
index.local.php
.htaccess
```

Repeating parent folder name within file name

```
FCom
  Catalog
    CatalogFrontend.php
    CatalogAdmin.php
```

Inconsistency between class name and file name

Keeping different classes within the same file

```
<?php
class Custom_Module_Frontend extends BClass
{
}

class Custom_Module_Frontend_Controller extends
FCom_Frontend_Controller_Abstract
{
}

class Custom_Module_Model_Test extends FCom_Core_Model_Abstract
{
```

```
}
```

Class and method naming

```
==== idiorm/paris ====
```

```
==== B* classes ====
```
