

Uninstalling Gift Certificate

To disable the module you must login to your server's terminal, go to Magento install directory and perform:

```
php bin/magento module:disable Unirgy_Giftcert
```

If full removal is needed, then all extension's files should be removed. Files are located at:

```
app/code/Unirgy/Giftcert/
```

If you want to remove all database traces of the module you should:

```
DROP TABLE `ugiftcert_cert`;  
DROP TABLE `ugiftcert_history`;  
DELETE FROM `eav_attribute` WHERE `attribute_code` LIKE '%giftcert%';  
DELETE FROM `catalog_product_entity` WHERE `type_id`='ugiftcert';
```

Removing database entries is not required except of

```
DELETE FROM `eav_attribute` WHERE `attribute_code` LIKE '%giftcert%';
```

which will prevent any PHP errors due to missing classes for GC attributes. If you want you can scan sales_flat tables for any %giftcert% columns and remove them.
