

uGiftCert and conditions

Conditions

Since version 1.1.1 it is possible to assign conditions to gift certificates. Those conditions are added and processed in similar fashion as Shopping Cart Rules conditions. To use this feature you have to enable it in global configuration settings.

The screenshot shows a configuration page for Gift Certificates. On the left is a sidebar menu with the following items: Gift Certificates, Persistent Shopping Cart, SALES (expanded), Sales, Sales Emails, PDF Print-outs, Tax, Checkout, Shipping Settings, and Shipping Methods. The main content area shows configuration options for currency (EUR, CAD, USD) and a section for 'Use certificate conditions'. This section includes a dropdown menu for 'Use certificate conditions' (set to 'Yes') and a dropdown for 'Add certificate info to order details' (set to 'No'). The 'Use certificate conditions' dropdown is labeled '[GLOBAL]' and the 'Add certificate info to order details' dropdown is labeled '[STORE VIEW]'. Below these are two tabs: 'Gift certificate customer interface on catalog product view' and 'Email delivery options'.

After it is enabled you will get a new tab on certificate edit page.

The screenshot shows the 'Edit Gift Certificate' page for 'TKTPR-FCSHW'. The left sidebar has 'Manage Gift Certificates' with sub-items: Gift Certificate Information, Gift Certificate Conditions (selected), and Transaction History. The main content area has a title 'Edit Gift Certificate 'TKTPR-FCSHW'' and a section 'Apply the rule only if the following conditions are met (leave blank for all products)'. Below this is a widget that says 'If ALL of these conditions are TRUE :'. There is a green plus icon in a circle next to the text, indicating where to add a new condition.

On the page you will see a widget that allows admin to set various conditions which have to be valid for the cart when certificate is applied for it to be accepted.

| | |
|--|---|
| Gift Certificate Email Template for Someone Else | <input type="text" value="All Store Views"/> |
| Certificate PDF Template | <input type="text" value="Main Website"/> |
| Store View * | <input checked="" type="checkbox"/> Main Website Store <input type="checkbox"/> BG <input checked="" type="checkbox"/> Default Store View |
| Sender name | <input type="text"/> |
| Disallow coupons | <input type="text" value="No"/> |

For this setting to have an effect, you must have [this setting](#) enabled.
