

# Uninstalling Gift Certificate

To disable the module it is enough to edit `app/etc/modules/Unirgy_Giftcert.xml` and make sure `<activ>true</active>` is changed to `<active>>false</active>`. Disabling from Admin System>Configuration>Advanced is not going to work.

If full removal is needed, then all extension's files should be removed. These are:

- `app/etc/modules/Unirgy_Giftcert.xml`
- `app/code/community/Unirgy/Giftcert/`
- `app/design/adminhtml/default/default/layout/ugiftcert.xml`
- `app/design/adminhtml/default/default/template/ugiftcert/`
- `app/design/frontend/base/default/layout/ugiftcert.xml`
- `app/design/frontend/base/default/template/unirgy/giftcert/`
- `js/colorpicker/`
- `app/locale/en_US/Unirgy_Giftcert.csv`
- `app/locale/de_DE/Unirgy_Giftcert.csv`
- `app/locale/fr_FR/Unirgy_Giftcert.csv`
- `app/locale/it_IT/Unirgy_Giftcert.csv`
- `app/locale/ja_JP/Unirgy_Giftcert.csv`
- `app/locale/nl_NL/Unirgy_Giftcert.csv`
- `app/locale/en_US/template/email/ugiftcert_self.html`
- `app/locale/en_US/template/email/ugiftcert_recipient.html`
- `app/locale/de_DE/template/email/ugiftcert_self.html`
- `app/locale/de_DE/template/email/ugiftcert_recipient.html`
- `app/locale/fr_FR/template/email/ugiftcert_self.html`
- `app/locale/fr_FR/template/email/ugiftcert_recipient.html`
- `app/locale/ja_JP/template/email/ugiftcert_self.html`
- `app/locale/ja_JP/template/email/ugiftcert_recipient.html`
- `app/locale/pt_PT/template/email/ugiftcert_self.html`
- `app/locale/pt_PT/template/email/ugiftcert_recipient.html`
- `skin/adminhtml/default/default/ugiftcert.css`

If you want to remove all database traces of the module you should:

```
DROP TABLE `ugiftcert_cert`;  
DROP TABLE `ugiftcert_history`;  
DELETE FROM `eav_attribute` WHERE `attribute_code` LIKE '%giftcert%';  
DELETE FROM `catalog_product_entity` WHERE `type_id`='ugiftcert';
```

Removing database entries is not required except of

```
DELETE FROM `eav_attribute` WHERE `attribute_code` LIKE '%giftcert%';
```

which will prevent any PHP errors due to missing classes for GC attributes. If you want you can scan `sales_flat` tables for any `%giftcert%` columns and remove them.
