

Data Validation

Products Import

Fields

Field	Name	Comments
sku	SKU	Always required
product.attribute_set	Attribute Set	Required for new products
product.type	Product Type	Required for new products
const.value	Ignore Value	Use to ignore specific columns data, use "alias" field for the column title
category.path	Category Path(s)	use URL path of categories to associate products

Errors

Message	Description
Empty SKU	
Duplicate SKU	
Empty or invalid product type of a new product	
Empty or invalid attribute set for a new product	
Missing required value for '[attribute]'	
Invalid option '[option]'	
Invalid int value	
Invalid decimal value	
Invalid datetime value	

Warnings

Message	Description
Column is out of boundaries, ignored	
Unknown option '[option]' for product '[sku]' attribute '[attribute]'	
Will not change product type for an existing product	
Will not change attribute set for an existing product	
The attribute '[attribute]' does not apply to product type '[type]', and will not be imported	
The attribute '[attribute]' does not apply to attribute set '[attribute_set]', and will not be imported	
The attribute '[attribute]' is not used, as it is a dynamic value in this product, and will not be imported	
If the attribute '[attribute]' will not used in configurable subproducts, this value might be missing	
Created a new option '[option]' for attribute '[attribute]'	
Created a new attribute set '[attribute_set]'	
Original file image does not exist	
Was not able to import image file	

Products Export

Fields

Field	Name	Comments
const.value	Constant Constant	Use to show constant value in all rows
